

DanMilk[®] pump'n'grow

milk made easy!

Mixing instructions Danmilk Pump'n'Grow

- One bag DanMilk Supreme (20 kg) mixed in 150 liter water.
- Add 50% of the water.
- Add and mix Piglet Boozt (iron) in the water.
- Add DanMilk Supreme and mix until the milk powder is 100% dissolved.
- Add the last 50% of the water and the milk is ready to be served.

Cleaning of Danmilk pump'n'grow

Daily cleaning [with animals]

Pump and tank:

- Clean the tank thoroughly in water.
- Recycle with Per-Aqua(0,05%) 50 ml Per-Aqua to 100 liter water in pump and expansion tank.

Hose:

- Open the hose with a mixture of 100 liters of water + 50 ml of Per-Aqua (0.05%) and feed it to the pigs for 30-60 minutes.

Weekly cleaning [No animals]

Weaning day: pump and tank

- Clean the tank thoroughly in water
- Recycle with **pump'n'grow AlcaClean** in expansion tank. 2 liter **pump'n'grow AlcaClean** (2%) to 100 liter water.
- NB! **pump'n'grow AlcaClean** may **not** be mixed with an acid product.

Hose:

- Close the hose to the sections with pigs.
- Open the hose to the section without pigs. You can't feed this to the animals.
- Rinse thoroughly with clean water after this.

Always ensure clean drinking water for the piglets!
